SUBJECT INDEX

Architectural fabrics, p. 36
Atomization, p. 83
Binder fiber characteristics, p. 100
Boiling water, p. 242
Breakdown fabrics, p. 46
Calendered PVC sheet, p. 46
Clothing fabrics, pp. 227, 242
Coatings, present and future, p. 260
Coated apparel, p. 91
CORFAM soft leather substitute, p. 9
Cotton, p. 83
Crosslinking, p. 46
Data storage, p. 183
Degradation, p. 242
Dimethylformamide, p. 195
DSC, SEM, p. 242
Embrittlement cracking, p. 46
Energy conservation, p. 83
Fabric structures, p. 36
Fiber bonding, p. 71
Fibers, p. 242
Fiber/yarn configurations on adhesion, p. 272
Flexible discs, p. 183
Fluoropolymer coatings, p. 36
Footwear fabrics, p. 227
Fracture, p. 242
Fractional qualities, synthetic leather, p. 195
Genuine leather, fiber structure and tensile strength, p. 9
Geomembranes, functions and applications, p. 53
Geosynthetics, p. 53
Geotextile applications, p. 53
Geotextiles, engineering functions, p. 53
Geotextiles, market growth, p. 53
Glass fabric coating, p. 36
Graboxan, p. 172
Hygenic properties, shoe materials, p. 172
Laminating and bonding nonwoven web structures, p. 71
Leather substitutes, pp. 9, 227
Liners, p. 183
Mechanical adhesion parameters, p. 272
Microporous coatings, p. 91
Moisture curing intermediates, p. 256
Nonwoven backings, p. 46
Non-woven fabric, p. 71
Permeable leather substitutes, p. 9
Plasticizer loss, p. 46
Polyester, pp. 183, 242
Polytetrafluoroethylene, p. 36
Protective workwear, p. 91
PU coated fabrics, p. 46, 227
PVC coated fabrics, p. 46
Rainwear, p. 91
Rayon-polypropylene, p. 183
Rigidity of bonded fabric, p. 100
Roofing membranes, p. 36
Soft leather substitutes, marketing and manufacturing, p. 9
Spray, p. 83
Structure property relationships, p. 100
Support fabric, shoe materials, p. 172
Surface coatings, p. 256
Synthetic leather, p. 195
Synthetic upper shoe material, p. 172
Tensile properties of bonded fabrics, p. 100
Thermally bonded nonwovens, p. 100
Ultrasonic energy fiber bonding, p. 71
